Cod. 08710496

Linea di pattumiere rotonde fissate direttamente sul fianco del mobile.

A round dustbins product directly mounted on the side of the cabinet.

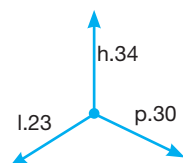

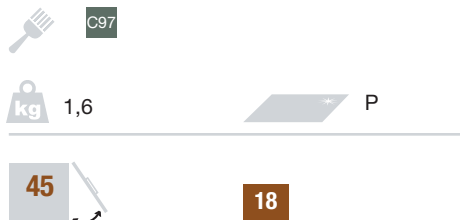

Caratteristiche:

1. Apertura automatica del coperchio all'apertura dell'anta.
2. Disponibile con finiture in acciaio lucido, alluminio quadrettato o plastica (bianco, sabbia, grigio).
3. Facile montaggio.
4. Secchi tondi da 10 o 12 litri.
5. Montaggio sul fianco destro o sinistro.

Features:

1. Automatic lid opening when the door is opened.
2. Available in polished steel finishing, plastic or chequered aluminium (in white, sand, grey).
3. Easy to assemble.
4. 10 or 12 litre capacity round bins.
5. Can be mounted the right or left side.

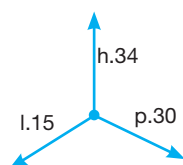

Easy 2.0

Cod. 08710458B

PBD SP SG34

Cod. 08710458A

PBD SP SS34

Linea di pattumiere di Grande Capacità semplice ed economico. Il supporto in nylon caricato fibra vetro si fissa direttamente all'interno dell'anta e sullo stesso è possibile agganciare i contenitori della serie Cover Box.

Caratteristiche:

1. Supporto in nylon caricato fibra vetro completamente riciclabile.
2. Contenitori in polipropilene completamente riciclabile di 15, 18 e 24 litri.
3. I contenitori utilizzati permettono, all'occorrenza, di inserire 2 sacchetti all'interno di un solo contenitore.
4. Semplicità di installazione con sole 2 viti.
5. Facile da pulire.

Product line of waste bins simple and economic with a big capacity. The plastic support is fixed directly on the inside of the door and on the same it is possible to hook on the containers of Cover Box series.

Features:

1. Plastic support completely recyclable
2. Bins in completely recyclable thermoplastic polypropylene of 15, 18 and 24 liters
3. The containers we use allow, if necessary, to insert two inner bags on the inside of a single container
4. Easy installation with only 2 screws.
5. Easy to clean.

Swing 2.0

Il sistema girevole ad Apertura Automatica con l'anta è un sistema innovativo che permette la chiusura ermetica del contenitore. Completamente realizzato in polimeri di Polipropilene e Nylon caricato in fibra di vetro, oltre che funzionale si presenta come estremamente robusto e durevole nel tempo. Un prodotto semplice dal design minimale, che nasce da importanti analisi di utilizzo in risposta alla richieste sia dei rivenditori, sia dei clienti finali. Studiato per scaricare tutto il peso del contenitore sul fianco della base anziché sullo sportello e non ledere nel tempo l'anta della cucina. Il sistema di trascinamento è adattabile a tutte le tipologie di anta grazie ad un pratico sistema che ne permette la regolazione. L'oggetto può esser montato sia sul fianco destro che sul fianco sinistro della base, o sovrapposto. E' Disponibile con contenitori da 12, 15, 18 e da 24 litri, i quali per le proprie caratteristiche intrinseche, possono ulteriormente esser suddivisi per effettuare raccolta differenziata all'interno di un solo contenitore.

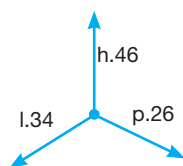

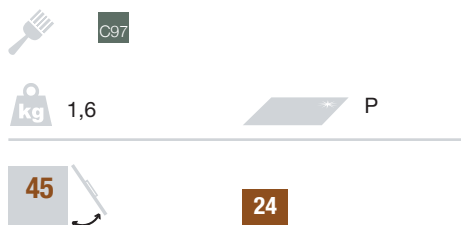

Caratteristiche:

1. Robusto supporto girevole del secchio in polimeri caricati.
2. Apertura e chiusura automatica tramite l'apertura dell'anta.
3. Disponibile per contenitori da 24, 18, 15 e 12 litri.
4. Idoneo al montaggio sia sul fianco destro che sul fianco sinistro della base.
5. Trascinatore regolabile per tutte le tipologie di anta.
6. Idoneo per tutte cerniere (consente le massime aperture).

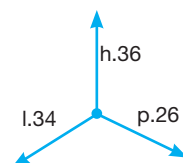

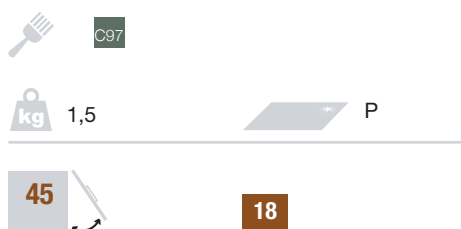

The Automatic Opening with the door is an innovative system that allows the container to be sealed. Completely made of Polypropylene and Nylon with fiberglass, as well as functional it looks extremely solid and durable over time. A basic product with minimal design, a result from an usage analysis in response to the demands of retailers and end customers. Designed to relieve the weight of the container on the kitchen base wall instead of the door and will not damage the kitchen door in time. The pull out system is suitable for all types of doors thanks to a practical system that allows it's adjustment. The system can be mounted either on the right side or on the left side of the base, or one on top of the other. It is available with 12, 15, 18 and 24 liters bins, which for their own intrinsic characteristics can be further subdivided into a waste separate system within a single container.

Caratteristiche:

1. Robust rotating bucket support made out of reinforced polymers.
2. Automatic opening and closing lid by opening the door.
3. Available for containers with a capacity of 24, 18, 15 and 12 liters.
4. Available on both the right and the left side of the kitchen base.
5. Adjustable pull out regulator for all types of doors.
6. Suitable for all hinges (allows maximum openings).

Cod. 08710507

Cod. 08710505

Block 2.0

Linea di pattumiere di Grande e Grandissima capacità per raccolta differenziata.

Sistema completo ed estremamente robusto realizzato con componenti in lamiera di acciaio zincato verniciato a polveri epossidiche e plastiche in Nylon caricato in fibra di vetro, viene fornito con guide Hettich ad estrazione totale con soft-closing. Il sistema ottimizza al massimo lo spazio disponibile sia per soluzioni di grandissima capacità in basi della cucina dedicate, sia in soluzioni in profondità ridotta idoneo anche per esser inserito in basi con lavello. Progettato per un'installazione semplice e veloce, ha un sistema di regolazione dell'anta in 3D pratico che garantisce la massima precisione. La sede di alloggio dei contenitori è caratterizzata da un profilo imbutito che oltre ad irrobustire la struttura la rende anche più gradevole. Il ripiano in metallo è un optional utile come coperchio fisso o ripiano porta oggetti. Disponibile per basi di larghezza 300mm, 400mm, 450mm, 500mm e 600mm ed in profondità 350mm, 420mm e 470mm; sia nelle versione da collegate direttamente all'anta, sia con maniglia per un'apertura manuale.

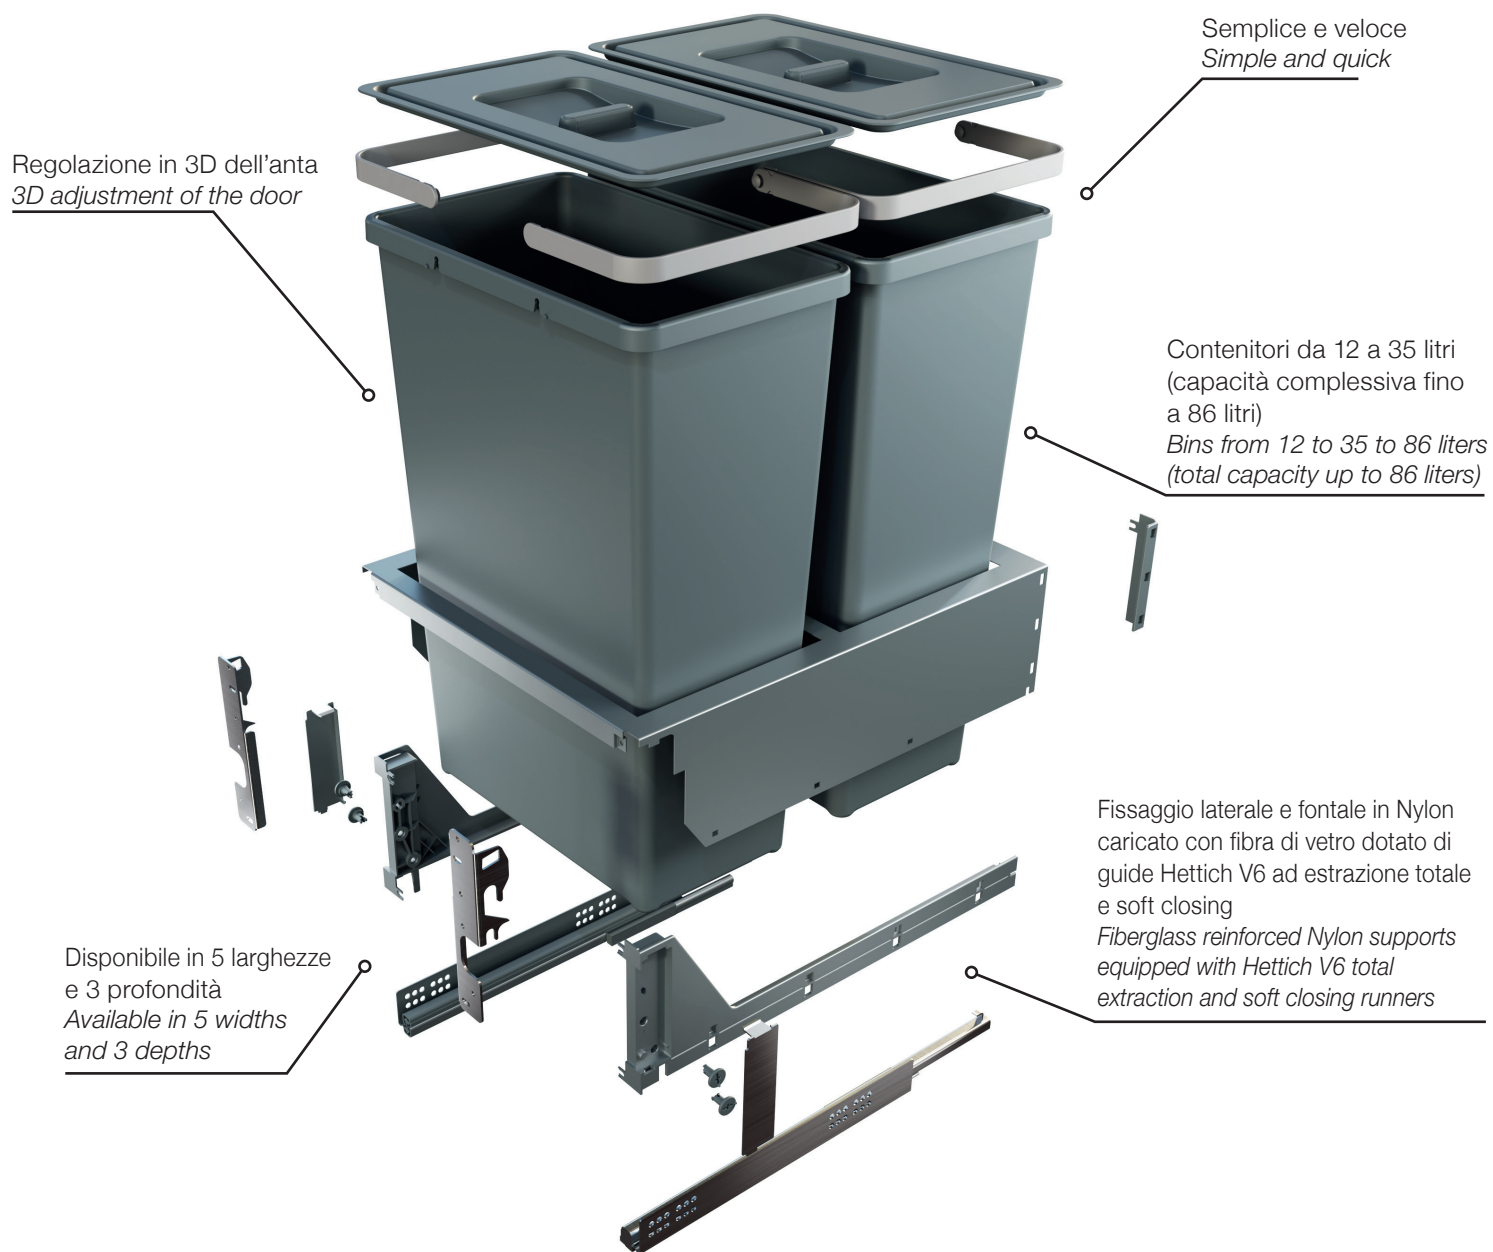

Caratteristiche:

1. Struttura in lamiera di acciaio zincato verniciato a polveri epossidiche realizzata in un monoblocco.
2. Fissaggio laterale e frontale in Nylon caricato con fibra di vetro dotato di guide Hettich V6 ad estrazione totale e soft closing.
3. Alloggi dei contenitori realizzati con profilo imbutito.
4. Contenitori da 12 a 35 litri (capacità complessiva fino a 86 litri).
5. Disponibile in 5 larghezze e 3 profondità.
6. Compatibile con fianchi da 16, 18 e 19 mm.
7. Può esser collegata direttamente all'anta oppure montato all'interno di una base con anta incernierata.
8. L'optional svolge la funzione di ripiano porta oggetti o coperchio fisso.
9. Facile da installare e da pulire.
10. Regolazione in 3D dell'anta. Regolazione in 3D dell'anta.

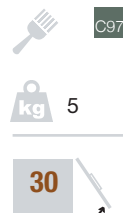

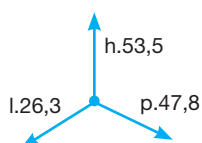

Large and Very Large Capacity bins range for separate waste collection. Extremely solid structure made out of components in Epoxy powder painted galvanized steel and Fiberglass connectors equipped with Hettich full extension soft-closing runners. The system maximizes the available space both for very large capacity solutions in standard kitchen bases and in lower depth cabinets. Block 2.0 is also suitable for under sink bases. Designed for quick and easy installation, it has a practical 3D door adjustment system that guarantees maximum precision. The housing space for the bins is characterized by a deep-drawn profile that strengthens the structure and makes it more attractive. The metal shelf (optional) can be used as a fixed lid or eventually as a simple rack for any object. Available for base widths of 300mm, 400mm, 450mm, 500mm and 600mm and depth 350mm, 420mm and 470mm; in the front door fixing version or for hinged doors cabinets with manual extraction.

Features:

1. Single block structure manufactured in Epoxy powder painted steel sheet.
2. Fiberglass reinforced Nylon supports equipped with Hettich V6 total extraction and soft closing runners.
3. Deep-drawn profile for containers housing.
4. Bins from 12 to 35 to 86 liters (total capacity up to 86 liters).
5. Available in 5 widths and 3 depths.
6. Compatible to 16, 18 and 19 mm panel thickness.
7. To be fixed directly to the front door or installed inside a cabinet base with hinged door.
8. The accessory acts as a shelf for objects or as a fixed cover.
9. Easy assembling and cleaning.
10. 3D adjustment of the door.

Block 2.0 U-Sink

Linea di pattumiere automatiche e manuali per basi lavello.

Sistema completo ed estremamente robusto realizzato con componenti in lamiera di acciaio zincato verniciato a polveri epossidiche e plastiche in Nylon caricato in fibra di vetro, viene fornito con guide Hettich ad estrazione totale con soft-closing. Il sistema ottimizza al massimo lo spazio disponibile grazie alla profondità ridotta che permette la raccolta differenziata (fino a 3 contenitori) nonostante l'ingombro dei sifoni e del lavello. Progettato per un'installazione semplice e veloce; la versione Automatica ha un sistema di regolazione dell'anta in 3D pratico e robusto che garantisce la massima precisione; la versione Manuale invece permette l'inserimento del prodotto anche in basi lavello con sportello con cerniere già esistenti. La sede di alloggio dei contenitori è caratterizzata da un profilo imbutito che oltre ad irrobustire la struttura la rende anche più gradevole. Il ripiano in metallo è un optional utile come coperchio fisso o ripiano porta oggetti. Disponibile per basi di larghezza 500mm e 600mm.

Line of automatic and manual waste bins systems for sink bases.

Complete and extremely robust system made out of galvanized steel sheet components painted with epoxy powders and with Nylon loaded with fiberglass, supplied with Hettich full extension runners with soft-closing. The system maximizes the available space thanks to the reduced depth that allows separate waste collection (up to 3 containers) despite of reducing encumbrance of the siphons and the sink. Designed for quick and easy installation; the Automatic version has a practical and robust 3D door adjustment system that guarantees maximum precision; the Manual version instead allows the insertion of the product also into existing door hinged sink bases. The housing structure of the containers is characterized by a deep-drawn profile which in addition strengthens the structure and also gives it a refinished look. The metal shelf is an optional useful as a fixed cover or a shelf for objects. Available for 500mm and 600mm wide bases.

Caratteristiche:

1. Struttura in lamiera di acciaio zincato verniciato a polveri epossidiche realizzata in un monoblocco.
2. Fissaggio laterale e frontale in Nylon caricato con fibra di vetro dotato di guide Hettich V6 ad estrazione totale e soft closing.
3. Alloggi dei contenitori realizzati con profilo imbutito.
4. Contenitori da 8 a 18 litri (capacità complessiva fino a 42 litri).
5. Disponibile in versione Automatica da collegare all'anta
6. Disponibile in versione Manuale per basi con anta incernierata.
7. Compatibile con fianchi da 16, 18 e 19 mm.
8. Può esser collegata direttamente all'anta oppure
9. L'optional svolge la funzione di ripiano porta oggetti o coperchio fisso.
10. Facile da installare e da pulire.

Features:

1. Monobloc structure in galvanized steel sheet painted with epoxy powders.
2. Side fixing and front in Nylon fiberglass equipped with Hettich V6 full extension slides with soft closing.
3. Accommodation of containers made with drawn profile.
4. Containers from 8 to 18 liters (total capacity up to 42 liters).
5. Available in automatic version to be connected to the door
6. Available in Manual version for bases with hinged door versions.
7. Compatible with 16, 18 and 19 mm sides.
8. Can be connected directly to the door.
9. The optional has the function of a shelf for objects or fixed cover.
10. Easy to install and clean.

PATTUMIERE

Metropolis

Unico nel suo genere il Sistema di pattumiere Metropolis è un accessorio da inserire direttamente nei cassettoni.

Un sistema flessibile che si adatta alle svariate misure interne dei cassetti, completamente modulabile e dal montaggio estremamente semplice.

The unique Metropolis dustbins system is an accessory that fits directly into drawers.

A flexible system that adapts to various internal sizes of drawers, completely modular and extremely easy to assemble.

Caratteristiche:

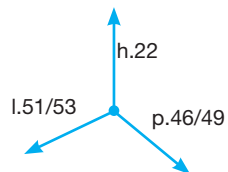

1. Disponibile in 2 altezze e 3 larghezze.
2. Fornito con guarnizione flessibile per compensare le eventuali differenze di misura bloccando perfettamente il vassoio.
3. Il modello in plastica è dotato di più vasche componibili, fornite in kit di montaggio, con una notevole riduzione di ingombro dell'imballo.
4. La possibilità di spostare i divisori garantisce estrema flessibilità.
5. È possibile l'aggiunta di accessori in filo d'acciaio cromato. (porta detersivo, porta vaschette, porta carta)
6. Tutte le pattumiere sono dotate di un secchio con coperchio con filtro antiodore (rigenerabile con lavaggio fino a 50 volte).

Features:

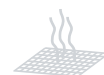

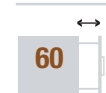

1. Available in 2 heights and 3 widths.
2. Supplied with a flexible seal to compensate for any differences in terms of size, fully blocking the tray.
3. The plastic model has a number of modular trays, supplied in kit form, with a significant reduction in the overall size of the packaging.
4. The dividers can be re-positioned to ensure flexibility.
5. Accessories in chromed steel wire can be added. (detergents holder, trays holder, paper holder).
6. All the bins have with a bucket with a lid which has an odour filter (which can be regenerated by washing for up to 50 times).

Compo Evo

Linea di pattumiere dedicate alla raccolta differenziata per i cassettoni sottolavello. Il sistema è composto da un monoblocco in metallo verniciato a polveri epossidiche nei quali alloggiare i contenitori. La carenatura mostra soltanto i coperchi e rende così il prodotto più essenziale e minimale. La sede di alloggio dei contenitori è caratterizzata da un profilo imbutito che oltre ad irrobustire la struttura la rende anche più gradevole.

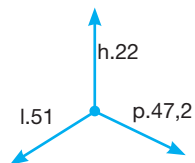

Product line of waste separation for under-sink drawers. The system is composed out of two single structures of galvanized steel and epoxy powder painted in which the bins are housed. The housing only shows the top of the bin and makes it the most essential and minimalist product. The seat of location of the bins is characterized by a deep-drawn profile which strengthen the structure and gives it a clean look

Caratteristiche:

- 1.** Struttura lamiera di acciaio zincato verniciato a polveri epossidiche realizzata in un monoblocco.
- 2.** Alloggi dei contenitori realizzati con profilo imbutito.
- 3.** Contenitori in polipropilene completamente riciclabile con capienza complessiva fino a 48 litri .
- 4.** Contenitori per detersivi o accessori vari per la pulizia.
- 5.** Disponibile per basi larghe 600 mm, 900 mm e 1200 mm.
- 6.** Tutte le pattumiere sono dotate di un secchio con coperchio con filtro divora odore (rigenerabile con lavaggio fino a 50 volte).
- 7.** Semplicità di installazione.
- 8.** Facile da pulire.
