CM SpA l'esperienza di oggi, dal 1967. La capacità di crescere nel tempo, la dinamicità del fare trasformata in progetti ambiziosi. CM è un'azienda familiare capace di creare in più di 50 anni di attività una storia d'impresa, ponte fra sogni, sacrifici e soddisfazioni. Forte di investimenti e creatività sempre al passo con i tempi, testimone negli anni di stile e contemporaneità nel mondo dell'arredo cucina.

CM SpA and the experience of nowadays since 1967. *CM is a family-run company that has been able, in more than 50 years of activity, to create a business history, bridge between dreams, sacrifices and satisfactions. Investment and creativity have allowed us to keep up with the times, witness over years of style and contemporary in kitchen furnishings world.*

Il materiale impiegato è Acciaio Inossidabile "AISI 304 18/10". Caratterizzato da un rapporto cromo/nickel costituito dal 18% di cromo (che accresce la durezza e la resistenza all'abrasione e al tempo stesso conferisce lucentezza e durata) e 10% di nickel (che conferisce forza e resistenza agli urti). La conferma tangibile presso la clientela CM della qualità del materiale impiegato è il marchio rilasciato dal Centro Inox (Associazione Italiana per lo Studio e lo Sviluppo delle applicazioni degli Acciai Inossidabili). Questo marchio, attesta che il materiale impiegato è esclusivamente acciaio inossidabile secondo la norma EN10020.

The used material is AISI 304 18/10 stainless steel. *Characterized by its chromium/nickel ratio consisting of 18% chromium (to increase hardness and abrasion resistance while giving shine and durability) and 10% nickel (to give strength and impact resistance). The Centro Inox label (Italian Association for the Design and Development of Stainless-steel Applications) gives CM's customers tangible proof of the quality of our material. This mark attests that the used material is exclusively stainless steel according to EN10020 standard.*

CM SpA un marchio italiano che produce solo in Italia. Portabandiera in forme e soluzioni innovative, con un marchio ancora oggi orgoglioso di saper produrre solo in Italia. Questo lo rende riconoscibile e lo onora di collaborare con le più distinte aziende del settore, non tralasciando le piccole realtà artigianali e industriali. La qualità del prodotto è costantemente garantita da un processo produttivo e ispettivo ben strutturato e dalla professionalità ed esperienza della forza lavoro, composta di uno staff tecnico qualitativo.

CM SpA, an Italian brand that produces in Italy only, *communicator of innovative solutions with a brand that it's nowadays proud to know how to produce in Italy only. This makes the brand recognizable and it give the possibility to collaborate with the most important sector Industries, without neglecting the small manufacturing companies and wineries. The product quality is constantly guaranteed by a well-structured productive and quality process and by the professionalism and the experience of the workforce, composed by a high-quality technical staff.*

Gioielli d'acciaio. CM oggi proietta lo sguardo verso un binomio basato sulla praticità e la conquista estetica. Per la più elevata qualità della vita in cucina, eccellente design italiano dalle linee rigorose e contemporanee e dalle soluzioni avanzate e innovative. Bellezza, comodità e resistenza sono i pilastri portanti dei prodotti CM. Un ventaglio di modelli suddivisi nelle quattro famiglie Luxury, Color, Classic e Professional. Gioielli d'acciaio costruiti per creare uno stile di qualità per la cucina moderna e per i clienti più esigenti.

Stainless steel jewels. *Today, CM looks toward the practicality and the aesthetic conquest. The highest quality of the kitchen, an excellent Italian design with simple and contemporary lines, advanced and innovative solutions. Beauty, comfort and strength are the base of CM's products. A big range of models divided in four families: Luxury, Color, Classic and Professional. These steel jewels have been created for realizing a quality style for the modern kitchen and for the most exigent customers.*

Funzionalità e velocità Functionality and speed

FORATURA PER LA RUBINETTERIA

I lavelli sono consegnati con foro diam. 35 , come indicato nel rispettivo disegno tecnico, per l'installazione dei miscelatori.

Alcuni modelli possono essere forniti con più fori, verificare su ogni specifico codice la dotazione di serie indicata.

I fori per miscelatore, sono idonei per l'installazione:

- Comandi remoti dei miscelatori
- Comandi remoti delle pilette automatiche
- Dispenser

TAP HOLES

The sinks are delivered with a 35 mm diameter hole for installation of mixer taps, as shown in the corresponding technical drawing.

Some models may be supplied with multiple holes; check the specific part number for the standard version.

Mixer tap holes are suitable for installing:

- *Remote controls for mixer taps*
- *Remote controls for pop-up wastes*
- *Dispensers*

I prodotti CM vengono forniti con istruzioni di montaggio, quote specifiche di foratura top, per le versioni previste dal modello scelto.

Ogni prodotto é dotato di piletta, sifone, ganci e sigillante (quest'ultimo escluso i modelli con guarnizione premontata).

Tutto per non lasciare nulla al caso, facilitare l'installazione, velocizzare i tempi e garantire un ottimo lavoro.

CM products are supplied with installation instructions and specific worktop drilling dimensions for the available versions of the chosen model.

Each product has a sink waste, trap, clips and sealant (the latter is not provided for models with a pre-fitted gasket).

All of this in order not to leave anything to chance, simplify installation, reduce times and ensure an excellent job.

La semplicità nell'installazione Simple installation

GUARNIZIONE PREMONTATA

Un macchinario automatico applica direttamente la guarnizione al lavello, in sostituzione del lavoro manuale dell'installatore, con conseguente garanzia di un'esecuzione sempre a regola d'arte. Il prodotto è quindi dotato di guarnizione che consente la perfetta sigillatura del punto di contatto fra lavello e piano di lavoro. La macchina dosatrice miscela i due componenti che compongono lo stucco: Poliolo + Isocianato, che uniti formano una sostanza poliuretanica, completamente atossica, che viene stesa in pochi secondi lungo tutto il perimetro dei lavelli CM.

Nel giro di pochi minuti la guarnizione è asciutta ed il lavello pronto per la spedizione, nel pieno rispetto dei normali termini di consegna.

PRE-FITTED GASKET

An automatic machine applies the gasket directly to the sink so that the installer does not have to do it by hand, ensuring that it is always done to the highest standards. The product therefore comes with a gasket for a perfect seal between the sink and the worktop. The dosing machine mixes the two components that make up the mastic: Polyol + isocyanate, which together form a completely non-toxic polyurethane substance that is spread along the entire perimeter of CM sinks in just a few seconds.

The gasket dries in just a few minutes, leaving the sink ready for shipment within normal delivery times.

I modelli con guarnizione premontata sono distinguibili dalla simbologia riportata nella pagine di presentazione.

Models with pre-fitted gaskets can be recognised by the symbols shown in the presentation pages.

GUARNIZIONE PREMONTATA PRE-FITTED GASKET

POSIZIONAMENTO VASCHE BOWL POSITION

esempio: lavello sx
example: left sink

l'indicazione di versione DX o SX si riferisce alla posizione della vasca più grande del lavello.

The LEFT or RIGHT version refers to the position of the larger sink bowl.

esempio: lavello sx
example: left sink

nel caso di modelli dalle caratteristiche particolari (v. esempio qui a fianco), si deve fare riferimento alla posizione della vasca più grande del lavello rispetto alla più piccola.

For models with special features (see the adjacent example), refer to the position of the larger sink bowl with respect to the smaller one.

esempio: lavello sx
example: left sink

per i modelli privi di gocciolatoio, occorre fare riferimento alla posizione della vasca più grande del lavello.

For models without a drainer, refer to the position of the larger sink bowl.

esempio: lavello dx
example: right sink

nel caso di modelli a vasca singola il cui foro di scarico non occupi una posizione centrale, occorre fare riferimento alla posizione del foro stesso per determinarne il verso.

For models with a single bowl in which the drain hole is not in the centre, refer to the hole position to establish its orientation.

Profili profiles

STANDARD
STANDARD

Il volume c'è, ma quasi non si vede. Il bordo infatti sporge dal piano di lavoro, ma in modo elegantemente impercettibile: il merito va all'inedito sistema di piegatura utilizzato da CM.

It has the volume, but is almost invisible. Thanks to CM's unique bending system, the edge protrudes from the worktop, but in a way that is elegantly imperceptible.

BORDO 8mm
8mm edge

Profilo deciso e linee marcate, un classico senza tempo: il lavello bello e robusto, come una volta. Essenziale, senza arretrare di un passo in fatto di raffinatezza e funzionalità.

Marked Profile and strong lines, a timeless classic: nice and sturdy sink, as it once was. Essential, without a step backwards in terms of sophistication and functionality.

FILOTOP
FILOTOP

Top e lavello perfettamente allineati creano un design essenziale. Bordo ultra-piatto e sistema d'aggancio avanzato: l'incasso è perfetto, minimale e rigoroso, pratico senza scomode sporgenze.

The worktop and sink are perfectly aligned to create a streamlined design. An ultra-flat edge and advanced fastening system provide a perfectly built-in solution: minimal and meticulous. Practical without inconvenient protrusions.

SLIM
SLIM

Installarlo è facile come appoggiarlo, l'effetto è di praticità e leggerezza: solo il tatto scopre il piccolo bordo perimetrale. Eleganza e funzionalità in cucina.

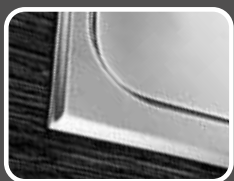

Installing it is as easy as laying it down. The effect is practical and light. Only touch will reveal the small perimeter edge. Elegance and functionality in the kitchen.

SOTTOTOP
UNDERTOP

Sotto sotto c'è il lavello più innovativo, esclusivo e adatto alle soluzioni alternative. Per sfruttare al meglio gli spazi, forme rettangolari e circolari da fissare sotto il piano di lavoro.

Hidden below is the most innovative and exclusive sink, suited to alternative solutions. Rectangular and circular shapes to be fastened under the worktop, making the most of the space.

PLUS
PLUS

Igiene e look della cucina garantiti. La piegatura obliqua del bordo agevola le operazioni di pulizia, impedendo le incrostazioni di calcare e il deposito di fastidiosi residui.

Kitchen hygiene and look guaranteed. The angled edge fold makes cleaning easier, prevents the build-up of limescale and tiresome residues.

ARIEL

Lavelli serie incasso slim - sottotop acciaio inox AISI 304-18/10

Per Ariel "l'essenziale è visibile agli occhi" con il suo dettaglio nell'area comandi ribassata. Design lineare con angoli a raggio "0" e specchiatura nel fondo vasca.

Built-in slim - undertop sink series made of AISI 304-18/10 stainless steel

For Ariel, "the essential is visible to the eye", which is drawn to the lowered controls area. A linear design with "0" degree angles and mirror finish on the bowl bottom.

FOCUS MIX

Lavelli serie incasso slim acciaio inox AISI 304-18/10

Focusmix nasce per distogliere lo sguardo dal classico, si propone come alternativa armonica rappresentando una ricerca di stile unico. Per nulla scontato e pronto al confronto con oggetti simili, mai uguali.

Built-in slim sink series made of AISI 304-18/10 stainless steel

Focus mix was created to draw attention away from the classic. A harmonious alternative that represents a unique style. This unconventional model stands up to any comparison: other sinks might come close, but will never be identical.

LUMEN Smart

Lavelli serie incasso slim-filotop-sottotop acciaio inox AISI 304-18/10

Lumen Smart, prende nome dalla sua nuova piletta. Nata dall'idea di creare un oggetto piacevole alla vista e pratico al suo utilizzo. Una vasca pratica ed elegante, abbinata con i miscelatori consigliati, diventa un prodotto versatile per niente scontato capace di rivoluzionare l'estetica, conquistando carattere e stile.

Built-in slim-filotop-undertop sink series made of AISI 304-18/10 stainless steel

Lumen Smart takes its name from the new sink waste. Designed to be attractive to look at and also convenient to use, this sink is practical and elegant. Paired with the recommended mixers this is a versatile sink with style, character and a groundbreaking design.

FILORAGGIATO

Lavelli serie incasso slim acciaio inox AISI 304-18/10

L'evoluzione della vasca quadra: design minimale, pareti dritte, angoli arrotondati e specchiatura del fondo. Estrema praticità, un ritorno al passato nella sua capienza ma progettato in una linea attuale. Filoraggiato è capace di inserirsi in ogni stile con un carattere deciso, capace di conquistare un funzionale spazio di lavoro e renderlo ottimale con i nuovi accessori consigliati.

Built-in slim sink series made of AISI 304-18/10 stainless steel

The evolution of the squared bowl: minimal design, straight walls, rounded angles and mirror finish on the bottom. Highly practical, the capacity of this bowl is vintage-inspired, but the design is contemporary. Filoraggiato has a strong character that fits well with any style. It makes a statement in a functional workspace, and can be optimised with our range of recommended options.

FILOQUADRA

Lavelli serie incasso slim - sottotop acciaio inox AISI 304-18/10

Determinata, con uno stile dal design pulito e sobrio, con pareti diritte, angoli a spigolo e fondo specchiato. L'interpretazione è chiara "un ritorno all'essenziale" tralasciando dove il troppo di tutto manca del necessario. Filoquadra è capace di offrirsi per ogni cambio di stile mantenendo il proprio accento nella qualità e praticità.

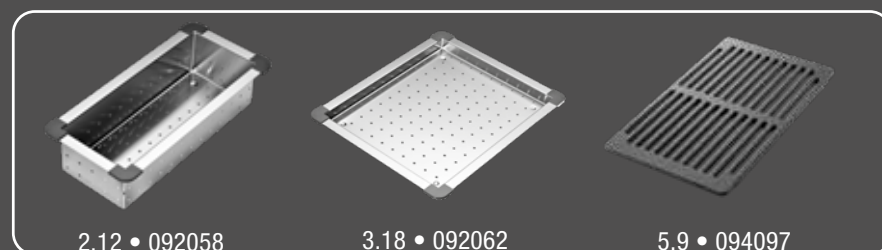

Built-in slim - undertop sink series made of AISI 304-18/10 stainless steel

This strong, steadfast model has a clean, spare design, straight walls, sharp angles and a mirrored bottom. The idea is clear: this model is stripped back to the essentials, leaving out anything that is not strictly necessary. Filoquadra is suitable for any style update, keeping the accent on quality and practicality.

EVOLUZIONE

Lavelli serie incasso slim acciaio inox AISI 304-18/10 vasca saldata.

Eleganza, minimalismo e semplicità uniti ad una vasca di raggio 30 mm sono i segni distintivi di Evoluzione. Un oggetto fluido nell'estetica del suo gocciolatoio, dettaglio che non sfugge allo sguardo e lo rende unico.

Built-in slim sink series made of AISI 304-18/10 stainless steel, welded bowl

Elegance, minimalism and simplicity in a 30 mm bowl are the hallmarks of Evoluzione. The fluid lines of the drainer instantly catch the eye, and make this a unique model.

BRANDO

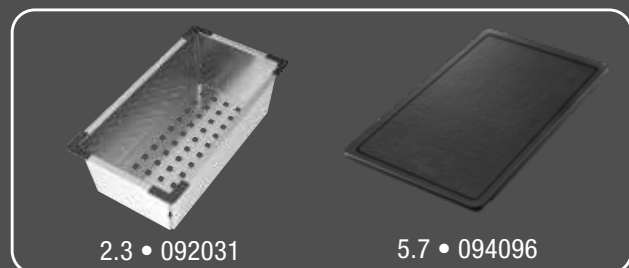

Lavelli serie incasso standard acciaio inox AISI 304-18/10 vasca saldata

Un design che esprime massima robustezza esaltando la vasca raggiata di 30 mm stampata a freddo, evidenziando tutta la forza della materia prima: l'acciaio.

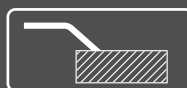

Built-in standard sink series made of AISI 304-18/10 stainless steel, welded bowl

This robust design is enhanced by the cold-rolled 30 mm bowl that really accentuates the power of the steel.

IRIDE

Lavelli serie incasso codice unico per slim - filotop - sottotop acciaio inox AISI 304-18/10 con trattamento PVD

Solista in cucina, è IRIDE. Un carattere esclusivo dato dalla colorazione del trattamento fisico PVD (Physical Vapor Deposition), un gioco di colori raffinato, senza eguali. Nato per valorizzare l'ambiente e destinato a farsi notare, lascia spazio alla creatività di progettisti e sognatori.

Built-in sink series with a single code slim - filotop - undertop, made of AISI 304-18/10 stainless steel, with PVD treatment

IRIDE takes the starring role. The exclusive colouring comes from the PVD treatment (Physical Vapor Deposition), which gives an exceptionally elegant effect. Born to add value and attract attention in any setting, this finish unleashes the creative talents of dreamers and designers!

GHIBLI

Lavelli serie incasso standard acciaio inox AISI 304-18/10 monostampo

Il lavello "Ghibli" rappresenta una tecnologia di raffinata concezione. Uno stile unico che sa adattarsi al classico quanto interpretare il contemporaneo mantenendo invariata la qualità che lo distingue la sua "praticità".

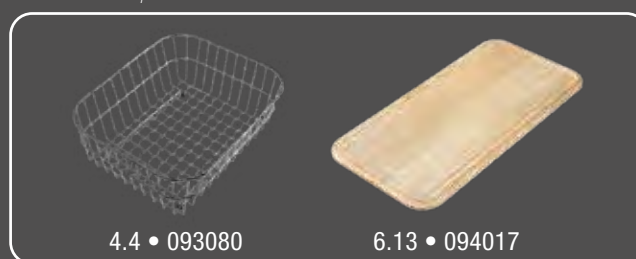

Built-in standard sink series made of AISI 304-18/10 stainless steel, monostamped

Ghibli represents technology with a touch of class. The unique design fits into a classic style but is also suited to a more contemporary setting, without losing its distinctive feature: practicality.

SIROS

Lavelli serie incasso standard acciaio inox AISI 304-18/10 monostampo

Linee morbide e sobrie, straordinaria versatilità. Come per "un classico" non ha bisogno di assodate presentazioni, è apprezzato per antonomasia.

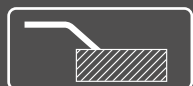

Built-in standard sink series made of AISI 304-18/10 stainless steel, monostamped

Clean, gently-contoured lines and remarkable versatility. As with any classic, it needs no lengthy introduction. This model is appreciated for itself.

Come mantenere in ottimo stato il tuo lavello in acciaio inox

Chi sceglie di arricchire la propria cucina con uno dei nostri lavelli in acciaio inossidabile, dunque, fa indubbiamente una scelta di qualità e durabilità. Come tutte le cose preziose, anche l'acciaio necessita di piccoli accorgimenti per preservare la propria bellezza e la funzionalità nel tempo, ecco come fare. Per mantenere il tuo lavello in condizioni ottimali non servono operazioni straordinarie ma una pulizia quotidiana e costante è importantissima! È sufficiente utilizzare detergenti neutri da stendere con un panno morbido seguendo il verso della satinatura. Assicurati sempre di aver rimosso ogni traccia di detergente, risciacquando abbondantemente con acqua calda e pulita e terminando con un'accurata asciugatura (queste per evitare striature e tracce di calcare). Per lo sporco più ostinato si possono utilizzare cautamente delle spugne (evitare assolutamente pagliette abrasive o metalliche, che possono graffiare e lasciare depositi di acciaio al carbonio con il rischio di formazione di ruggine). Per la pulizia settimanale, suggeriamo un prodotto cremoso come il "BUFFEL INOX", da usarsi puro, senza diluirlo, su un panno/carta, sempre seguendo il verso della satinatura. Questo prodotto pulisce, cura e protegge l'acciaio inox. Puoi chiederlo direttamente al nostro numero verde attivo allo 008 001 004 2009 o inviandoci una e-mail all'indirizzo info@cm-spa.it.

Seguendo questi semplici consigli, il tuo lavello in acciaio inox manterrà inalterato il suo splendore.

How to keep your stainless steel sink in great condition

Those who choose to enhance their kitchen with one of our stainless steel sinks stainless, therefore, undoubtedly make a choice of quality and durability. Like all precious things, steel also needs small precautions to preserve its beauty and functionality over time, here's how to do. Keeping your sink in top condition doesn't require operations extraordinary, but constant daily cleaning is most important! È simply use neutral detergents to be spread with a soft cloth following the direction of the satin finish. Always make sure you have removed all traces of detergent, rinsing thoroughly with warm, clean water and clean water and finishing by drying thoroughly (these to avoid streaks and traces of lime scale). For more stubborn dirt, sponges can be used cautiously (absolutely avoid abrasive or metal scouring pads, which can scratch and leave carbon steel deposits with the risk of forming rust). For weekly cleaning, we suggest a creamy product such as the "BUFFEL INOX," to be used pure, without diluting it, on a cloth/paper, always following the direction of the satin finish. This product cleans, cares for and protects stainless steel. You can ask us directly at our active toll-free number at 008 001 004 2009 or by emailing us at info@cm-spa.it.

By following these simple tips, your stainless steel sink will keep unaltered its splendor.

La qualità dei lavelli in acciaio inox

È nostra premura, ma soprattutto orgoglio, informare la clientela che i nostri lavelli sono realizzati esclusivamente con l'utilizzo di acciaio inossidabile AISI 304 18/10. Si tratta di un materiale di altissima qualità, caratterizzato da un rapporto cromo (che aumenta la durezza, la resistenza all'abrasione, la lucentezza e la durata) e nickel (che conferisce forza e resistenza agli urti). A garanzia di questo l'azienda CM dispone, per i propri prodotti, del marchio che contraddistingue il materiale "acciaio inossidabile" secondo la definizione della norma EN 10020. Questo marchio viene rilasciato da Centro Inox Servizi S.r.l., società controllata da Centro Inox (Associazione Italiana per lo Studio e lo Sviluppo delle applicazioni degli Acciai Inossidabili). Una delle caratteristiche principali dell'acciaio inox è la resistenza alla corrosione e alla ruggine, grazie al cosiddetto "strato passivo", un sottile film trasparente e protettivo costituito da soli pochi atomi di elementi di lega. Lo strato passivo, se graffiato o scalfito, si autorigenera immediatamente a contatto con l'ossigeno contenuto nell'acqua o nell'aria, proteggendo il materiale sottostante dall'attacco corrosivo.

The quality of stainless steel sinks

It is our concern, but most of all pride, to inform customers that our sinks are made exclusively with the use of stainless steel AISI 304 18/10. This is a material of the highest quality, characterized by a chromium ratio (which increases hardness, abrasion resistance, the shine and durability) and nickel (which gives strength and impact resistance). As a guarantee of this, the CM company has, for its products, the mark which distinguishes the material "stainless steel" according to the definition of the EN 10020 standard. This mark is issued by Centro Inox Servizi S.r.l., a company a subsidiary of Centro Inox (Italian Association for the Study and Development of Stainless Steel Applications). One of the main characteristics of stainless steel is its resistance to corrosion and rust, thanks to the so-called "passive layer," a thin film transparent and protective layer consisting of only a few atoms of alloying elements. The passive layer, if scratched or nicked, immediately self-heals on contact with oxygen contained in water or air, protecting the underlying material from corrosive attack.
